

# Use of EBAMS for Air Emergencies

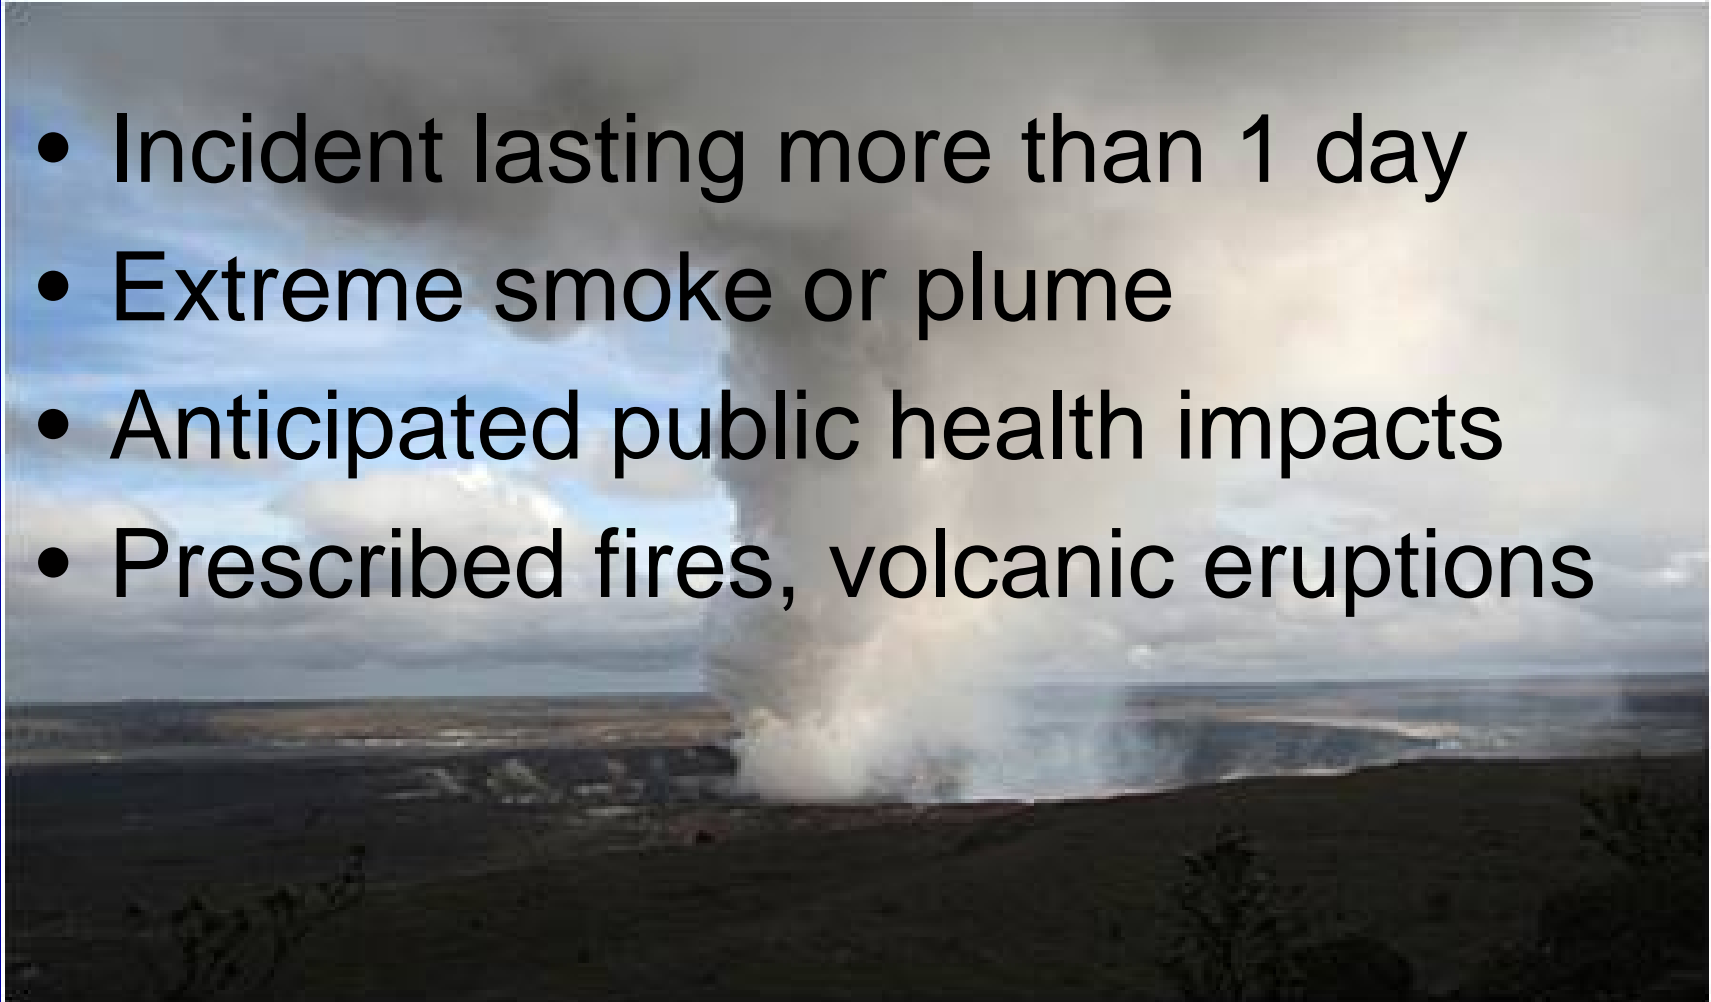

CARPA Data Subcommittee

CARPA EBAM training, June 30, 2010

# When Would EBAM Monitoring be Necessary ?

---

- Incident lasting more than 1 day
- Extreme smoke or plume
- Anticipated public health impacts
- Prescribed fires, volcanic eruptions

# When/How to Request Monitoring Assistance

- Insufficient resources or may be overwhelmed
- Mutual aid
- Initial email from APCO to CARB OER
- Follow with formal request from APCO to op area (County) ➡ REOC ➡ CalEMA
- Mission request to CARB OER to provide monitoring assistance

# Deployment Coordination

---

Pre-planning and coordination (CARPA)

Necessary for multi-agency response

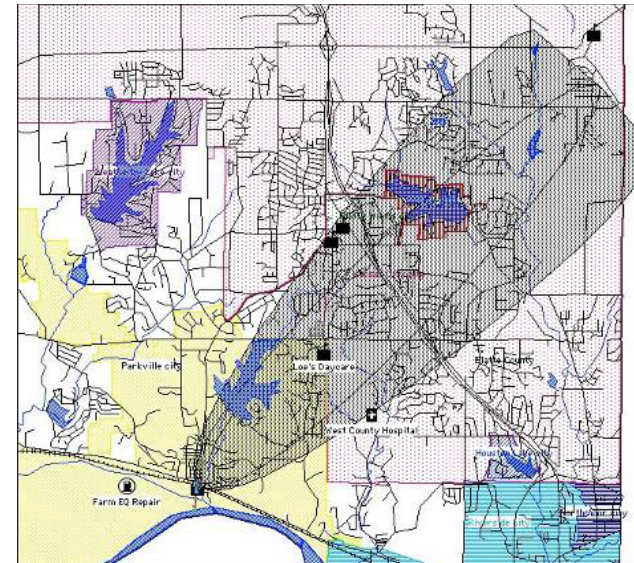

# Deployment Coordination

---

- Air Sampling Plan
  - Incident objectives (what)
  - Personnel (who)
  - Coordinated siting (where)
  - Data collection and management (how)
  - *(Soon to be) in the CARPA Toolkit*

# 2008 No CA Wild Fires
